

| Accession Number | Description  | Fold Enrichment | UniquePeptideCount |
|------------------|--|-----------------|--------------------|
| <b>Q9UK33</b>    | <b>Zinc finger protein 580</b>                           | <b>11.06</b>    | <b>2</b>           |
| O43683           | Mitotic checkpoint serinethreonine-protein kinase BUB1   | 6.03            | 1                  |
| Q7Z444           | GTPase ERas  | 6.03            | 1                  |
| A1L4B6           | Tripartite motif-containing 42                           | 5.09            | 1                  |
| P62263           | 40S ribosomal protein S14                                | 2.40            | 2                  |
| P13765           | HLA class II histocompatibility antigen DO beta chain    | 2.07            | 1                  |
| Q1KMD3           | Heterogeneous nuclear ribonucleoprotein U-like protein 2 | 1.29            | 2                  |
| O60245           | Protocadherin-7  | 1.27            | 1                  |
| P04259           | Keratin type II cytoskeletal 6B                          | 1.20            | 4                  |
| A2NUT2           | Lambda-chain AA -20 to 215                               | 1.02            | 3                  |
| P02768           | Serum albumin  | 0.77            | 6                  |
| P02769           | Serum albumin  | 0.73            | 37                 |
| Q92841           | Probable ATP-dependent RNA helicase DDX17                | 0.71            | 1                  |
| D3DPG0           | Titin isoform CRA_a                                      | 0.62            | 1                  |
| P02656           | Apolipoprotein C-III                                     | 0.57            | 1                  |
| P07437           | Tubulin beta chain                                       | 0.56            | 4                  |
| H7BY58           | Protein-L-isoaspartate O-methyltransferase               | 0.49            | 3                  |
| P49327           | Fatty acid synthase                                      | 0.49            | 1                  |
| P35527           | Keratin type I cytoskeletal 9                            | 0.47            | 6                  |
| P13647           | Keratin type II cytoskeletal 5                           | 0.43            | 2                  |
| P02533           | Keratin type I cytoskeletal 14                           | 0.42            | 2                  |
| P60709           | Actin cytoplasmic 1                                      | 0.36            | 3                  |
| P68371           | Tubulin beta-4B chain                                    | 0.31            | 2                  |
| Q00839           | Heterogeneous nuclear ribonucleoprotein U                | 0.30            | 1                  |
| P04264           | Keratin type II cytoskeletal 1                           | 0.25            | 4                  |
| P05787           | Keratin type II cytoskeletal 8                           | 0.23            | 3                  |
| P08727           | Keratin type I cytoskeletal 19                           | 0.21            | 1                  |
| P07814           | Bifunctional glutamateproline--tRNA ligase               | 0.21            | 1                  |
| Q149N5           | DOCK4 protein  | 0.17            | 1                  |
| P35908           | Keratin type II cytoskeletal 2 epidermal                 | 0.15            | 2                  |
