

PRC Case Summary Report For [REDACTED]

Serology Alert:	EBV IgG Ab=Positive
	CMV Total Ab=Positive

Issue Resolutions

Tissue	Issue Description	Resolution Comments	Date Submitted
Esophagus - muscularis	Includes major admixture of smooth and skeletal muscle indicating sampling of upper esophagus.	Unacceptable for GTEX: excessive extraneous tissue/tissue location not per GTEX SOP.	[REDACTED]
Ileum	Insufficient lymphoid tissue to warrant analysis for GTEX.	Unacceptable: inadequate target tissue.	[REDACTED]

Specimens

Case #	Specimen ID	Tissue	RNA Integrity Number (RIN)	Image ID	Slide ID	Autolysis	Comments	Inventory Status
[REDACTED]	[REDACTED]	Adrenal glands	Pending QA	81228	3041359	1	2 pieces; predominantly adrenal cortex, trivial component of attached fat	Acceptable
[REDACTED]	[REDACTED]	Aorta	Pending QA	81229	3041360	1	6 pieces; mild plaque	Acceptable
[REDACTED]	[REDACTED]	Spleen	Pending QA	81252	3041361	0	2 pieces	Acceptable
[REDACTED]	[REDACTED]	Pancreas	Pending QA	81231	3041362	1	2 pieces; acute pancreatitis	Acceptable
[REDACTED]	[REDACTED]	Omentum	Pending QA	81232	3041363	0	2 pieces	Acceptable
[REDACTED]	[REDACTED]	Mammary tissue (breast)	Pending QA	81233	3041364	0	2 pieces; 1 is predominantly fat with <10% fibrous component, 2nd is predominantly stroma with scattered ducts with mild hyperplasia, bundles of smooth muscle, and ~15% fat	Acceptable
[REDACTED]	[REDACTED]	Suprapubic skin	Pending QA	81253	3041365	0	6 pieces; well trimmed, up to 10% internal fat, hair-bearing skin	Acceptable
[REDACTED]	[REDACTED]	Prostate	Pending QA	81235	3041366	1	2 pieces; good admixture of glands/stroma	Acceptable
[REDACTED]	[REDACTED]	Testis	Pending QA	81236	3041367	0	2 pieces; decreased sperm maturation	Acceptable
[REDACTED]	[REDACTED]	Thyroid gland	Pending QA	81237	3041368	1	2 pieces; mild nodular hyperplasia	Acceptable
[REDACTED]	[REDACTED]	Adipose tissue	Pending QA	81238	3041369	0	2 pieces; adipose tissue with ~10% fibrous component, some tissue defects	Acceptable
[REDACTED]	[REDACTED]	Skin	Pending QA	81239	3041370	0	6 pieces; mostly well trimmed with minimal internal/external fat, 1 with ~10% attached fat, epidermis measures 41 microns	Acceptable
[REDACTED]	[REDACTED]	Esophagus - muscularis	Pending QA	81240	3041371	0	6 pieces; includes major admixture of smooth and skeletal muscle indicating sampling of upper esophagus	Unacceptable
[REDACTED]	[REDACTED]	Esophagus - mucosa	Pending QA	81241	3041372	0	6 pieces; intact with prominent muscularis mucosae, rare cluster of submucosal glands	Acceptable
[REDACTED]	[REDACTED]	Gastroesophageal junction	Pending QA	81242	3041373	1	6 pieces; target muscularis, small attachments of submucosa/adventitia	Acceptable
[REDACTED]	[REDACTED]	Stomach	Pending QA	81243	3041374	1	8 pieces; variable representation of mucosa, submucosa, and muscularis; dilated deep glands, moderate acute gastritis	Acceptable
[REDACTED]	[REDACTED]	Muscle, skeletal	Pending QA	81244	3041375	0	2 pieces; skeletal muscle with <10% fat/fibrous component	Acceptable
[REDACTED]	[REDACTED]	Nerve - tibial	Pending QA	81245	3041376	1	2 pieces; includes 20 and 40% internal/external fat	Acceptable
[REDACTED]	[REDACTED]	Artery - tibial	Pending QA	81246	3041377	1	2 pieces; focal intimal thickening	Acceptable
[REDACTED]	[REDACTED]	Lung	Pending QA	81247	3041378	1	2 pieces; include pleura (target is 1 cm below pleura), some widening of airspaces, small bone marrow embolism	Acceptable
[REDACTED]	[REDACTED]	Sigmoid colon	Pending QA	81248	3041379	1	6 pieces; target muscularis with small portion of residual submucosa/mucosa in 1 piece	Acceptable
[REDACTED]	[REDACTED]	Colon	Pending QA	81249	3041380	1	6 pieces; variable representation of mucosa/submucosa/muscularis, small amount of adherent mucus	Acceptable
[REDACTED]	[REDACTED]	Ileum	Pending QA	81250	3041381	1	6 pieces; mucosa/submucosa with scattered lymphoid aggregates	Unacceptable

Issues

Specimen ID	Issue Description	Pending Further Follow Up	Resolved	Resolution Comments
██████████	Includes major admixture of smooth and skeletal muscle indicating sampling of upper esophagus.	N	Y	Unacceptable for GTEX: excessive extraneous tissue/tissue location not per GTEX SOP.
██████████	Insufficient lymphoid tissue to warrant analysis for GTEX.	N	Y	Unacceptable: inadequate target tissue.

General Information

Overall Staining of Slides good	Overall Processing/Embedding good
